<sup>\*</sup>In preparation as of July 1957

The schedule used in the nationwide survey of Household Food Consumption made in the spring of 1955 is reproduced to provide research workers and other interested groups with background information on data published in reports of the findings on this study. The schedule may serve as an aid to those contemplating the use of the personal interview technique for obtaining comparable primary data. From time to time there are inquiries as to the detailed information collected with the survey for particular foods and the manner in which the data were collected. The schedule should be an aid in answering such inquiries.

The survey in which this schedule was used was made in April-June 1955 for the Agricultural Research Service and the Agricultural Marketing Service of the U.S. Department of Agriculture. In the Agricultural Research Service the work was conducted by the Household Economics Research Branch and in the Agricultural Marketing Service by the Market Development Branch and the Statistical and Historical Research Branch. The data were collected and tabulated by National Analysts, Inc., under contract with the Department.

## Record Cards A and B (FC-3 and -4)

Two record cards were used for different parts of the household sample. Record Card A was used for the basic sample of households which was a national self-weighting, area probability sample. Record Card B was used for the supplementary part of the sample which was selected in the same manner as the basic sample but was limited to rural areas. Schedules from farm families only were obtained in the supplementary sample.

The record card was designed to establish the "eligibility" of the household and to obtain certain information about the household and its members. The record card provided information on those eligible households for which a complete food schedule was not obtained; it yielded data useful in checking sample validity.

## The Schedule (FC-1)

Items on the cover sheet of the schedule, which is Section A, were set up for identification or summary purposes.

Section B, "Family and Household Composition During Past 7 Days, Number of Meals Eaten At Home, Family Meals Away, and Expense for Food and Drink Away from Home During the Past 7 Days," provided information needed to determine the size and composition of the family and household for both the economic and nutritional analysis.

Section C, "Report of Food Used During Past 7 Days," had as its objective the obtaining of a complete recall of the food used in the household during the period--its quantity, form, source, and cost.

Section D, "Home Baking Practices," provided information on home baking, with emphasis directed toward determining the extent of home baking and the use of prepared mixes.

Section E, "Food Produced at Home in 1954 for Household Use," included information on selected major foods raised for home use.

Section F, "Freezing Facilities; Home Canning and Freezing of Food in 1954," was designed to obtain information on the availability of equipment in 1954 for freezing foods and the total quantities of food canned or frozen during 1954 by homemakers.

Section G, "Data Needed to Classify 1954 Economic Families by Income," provided information necessary for grouping households by income so that the relationships between income and food consumption patterns could be studied.

Section H, "Data Needed to Classify Households by Sale or Rental Value," was directed toward the possible development of a system of classification based on sale value of owned property and rental value of rented farms or homes. For nonfarm rented residences information was obtained so that gross monthly rent unfurnished plus utilities could be determined.

### Instructions To Interviewers

A manual of instructions for using the schedule was prepared by the contractor as a guide for the interviewers during the collection period. The basic purpose of the manual was to insure that all interviews would be conducted in an identical and systematic fashion. The Department does not have copies of this manual available for distribution.

This administrative manual set forth the purpose and plan of the survey, definitions of pertinent terms and concepts, administrative details required of the interviewers during field work, and the proposed time schedule, and instructions on sampling, filling the record card (on which eligibility was determined), and filling the schedule here reproduced. At training schools the manual was discussed with interviewers and it served also as a reference manual throughout the collection period.

In addition to giving specific instructions on practically every question indicated on the schedule, showing examples of the various types of entries, and furnishing abbreviations which would shorten interview time, the manual devoted considerable space to aids in obtaining a complete accounting of the food used during the period surveyed. Some of these aids consist of lists of items to include and to exclude, tips on helping respondents remember the food used in the week, how to keep the beginning and ending of the 7-day period in mind, and comments on how to determine and report quantities for particular foods.

During training each interviewer had practice in sampling, obtaining cooperation from a non-sample household, and filling a more or less complete practice schedule which was later reviewed in conference with a supervisor. Points needing clarification were taken up in later sessions of the training school or were the subjects of supplements to the manual.

# G. DATA NEEDED TO CLASSIFY 1954 ECONOMIC FAMILIES BY INCOME

Now we hove completed the information on foods that we needed from you. To use this information we want to include it with information from families (groups) the beginning of this interview we determined that (MENTION PRIMARY ECONOMIC FAMILY MEMBERS FROM SECTION B) live together and draw from a that have about the same amount of money to spend. Since it's too early in 1955 to determine income for this year, I'll need to ask you about lost year. common fund for their major items of expense, or they pool their savings. Now, 1'd like to ask you about this arrangement in 1954, last year.

- 1. Which of these people lived together in 1954?
- 2. (FOR THOSE IN EC. FAMILY WHO LIVED TOGETHER IN 1954) Which of these people kept their finances together -- that is, either pooled their sovings or maintained o common fund for their major items of expense in 1954? (LIST IN COL. 1 OF TABLE BELOW)
- (IF "YES", 3. Was there anyone else not here now who lived with this fomily (group) last year who pooled savings or shared expenses with the family in 1954? LIST IN COL. 1 OF TABLE BELOW)
- 4. Now I'd like to ask you about the income of these people (COL. 1 BELOW). Did he (she) have any income from wages or salary in 1954? (CHECK ANSWER IN COL. 2 BELOW FOR EACH PERSON. IF "YES", FILL COLUMNS 4, AND 5 FOR EACH WAGE AND SALARY EARNER. BE SURE COLUMNS 5, 6, 7 AND 8 ARE FILLED IF RESPONDENT IS UNABLE TO FILL COL. 4).
- (CHECK ANSWER IN COL. 3 BELOW FOR EACH PERSON. IF "YES", ASK Q.6) 5. Did he (she) have any income from farming in 1954?
